History Colorado is a historical society dedicated to offering public access to the cultural and heritage resources of Colorado. Their statewide activities support tourism, historic preservation, and education and research related to Colorado's rich western history. With the recent launch of the Online Portal, the collection is now widely accessible to the public, to researchers, and to other museums and archives via the Web. The portal readily facilitates access to profoundly important collection resources which History Colorado has amassed to document the people and places of Colorado. Through the Stephen Hart Library and Research Center, visitors can access the collection and can also take advantage of research assistance and photo reproduction services.

Engage with People, Places and Stories: History Colorado Takes You There with Argus

History Colorado is a historical society dedicated to offering public access to the cultural and heritage resources of Colorado. Their statewide activities support tourism, historic preservation, and education and research related to Colorado's rich western history. With the recent launch of the Online Portal, the collection is now widely accessible to the public, to researchers, and to other museums and archives via the Web. The portal readily facilitates access to profoundly important collection resources which History Colorado has amassed to document the people and places of Colorado. Through the Stephen Hart Library and Research Center, visitors can access the collection and can also take advantage of research assistance and photo reproduction services.

Challenges

History Colorado leaders, including Melissa de Bie, Director of Collections Management and Registration, wanted to move to a SaaS (vendor hosted) collection management solution to take advantage of ongoing maintenance and automatic upgrades, and eliminate the need to manage the infrastructure themselves. Also, as satisfied long term self-hosted clients of “classic” Argus, they wanted to fully leverage the powerful new Web-based version. Given their excellent relationship with Lucidea, they were very confident continuing the partnership by both upgrading to the Web offering and moving to the SaaS option. When they learned about the robust Web publishing capabilities Argus offers, they realized it would accommodate all their top priorities: user friendliness; easy reporting capabilities; easy import/export and Web access to the collection.

"Argus serves researchers, educators, and museums as an unprecedented and user-friendly means of engaging with Colorado’s history. It readily facilitates access to profoundly important collection resources which History Colorado has amassed to document and preserve the people, places, stories and material culture of our state."

- Melissa de Bie, Director of Collections Management and Registration - History Colorado
History Colorado’s collection

History Colorado’s incomparable collections encapsulate the state’s rich history and help illuminate the present in the context of the past.

- 200,000 artifacts
- 15 million archive files
- 1 million photographs
- 7 museum sites in Colorado, 2 off-site storage facilities
- Collecting for over 100 years

Solutions

Remote access via the Web is of particular importance. It allows Ms. De Bie and her team to showcase specific collections and online exhibitions, broadening their public outreach and supporting HC’s goal of facilitating research and education. The ability to perform the full suite of Argus administrative functions remotely is also critical since many staff members work from home or log in from different sites in the History Colorado network. As is often the case for museums and archives, there are many volunteers and interns who must learn to use a collection management system. With minimal training required and robust security and permission levels, Argus is the perfect option, allowing interns and volunteers to start working with artifacts right away – offering them a more rewarding experience, with workflow that accelerates task completion and helps increase productivity.

With Argus, History Colorado can:

- Measure It and Manage It with the Power of Statistics
  - Determine curatorial focus, tailor online services, support virtual visitors
- Do-it-Themselves with Batch Record Importing/Creating/Updating
  - Enjoy independence and operational efficiency
- Please Everyone – with Customized Views
  - Deliver role/department based views; leverage as a time saver for training and workflow
- Power Up the Portal
  - Customize for every audience and auto-enable service requests, research requests or site feedback

About Lucidea

Lucidea is the premier knowledge and collections management software company, helping people navigate the ever expanding universe of content and information. We achieve this by providing tools that accelerate access to knowledge resources, while simplifying their management.
