

ANALYTICS DASHBOARD

Our Analytics Dashboard is designed to anticipate the critical questions that every senior leader wants to answer, delivering results at a glance

Empower yourself with knowledge that informs action

Imagine accessing real time data and metrics that inform your decisions and guide your strategies.

Key Benefits

TELL A STORY

Engage your leadership with what really matters; narrate your operational performance and productivity in language they understand.

SEE WHAT'S IMPORTANT

Select only the fields you need to support the analysis you want to do; make changes real-time when needed.

STATISTICS & TRACKING

Analyze trends in resource usage and staff allocation; map to budgets and generate management reports.

INTEGRATION, SIMPLICITY

Simple to implement, built to mine your SydneyEnterprise or GeniePlus data; its intuitive Web interface is only a mouse click away.

Lucidea's Analytics Dashboard is purpose-built to instantly deliver critical data you need to monitor and manage your department's performance. It delivers detailed data and trend analysis that drive optimal decision-making.

ANALYTICS DASHBOARD

Capabilities and Impact

LucideaCore Analytics Dashboard embodies proven business intelligence, database creation, analytics, and workflow best practices gained over 30+ years of working with clients worldwide.

SPOTLIGHT

- Expense management
- Staff performance
- Usage statistics

RESPOND

- Address ad hoc questions from management with confidence and accuracy

VALIDATE

- Support proposed budget with trends and back it up with statistics

PREPARE

- Build your content for quarterly or annual “state of the department” presentations

CONSOLIDATE

- Eliminate spreadsheets, manual entry, cumbersome report generation

PERFORM

- Evidence-based continual improvement
- Agility: change course as needed to run a successful library, knowledge or information center business

Spend Time Strategizing, not Searching

Examples:

1. You don't manage your department in a vacuum; collaboration with department, practice/functional and office leaders is critical. Use the Analytics Dashboard to provide real time data that shows which practice groups, departments, functional areas, resource types, or locations cost the most, or least. Use this information to develop policies and budgets, right-size collections in your largest and smallest offices, and enhance content available to specific user groups. Quantify, in an instant, the value of resources dedicated to support a specific project or client, so you can ensure stakeholder confidence in your efficiency and effectiveness.

2. At budget time, your CFO may not be interested in granular detail, but you'll need to provide 3-5 years of trends at a top level. You'll need to show and explain percentage increases (or decreases!) in your overall content budget, as well as to spotlight trends in areas such as print versus digital spend, office copies by practice area, and so forth. You'll also need to show trends in staffing headcount and expenses.

Envision a financial snapshot tailored to your department that presents the data you want to show, as opposed to “one size fits all” reports from the Finance Department. Imagine being able to generate powerful, meaningful analytics within minutes, from your own integrated library system (ILS).

Powered by LucideaCore

LucideaCore is the platform that powers our leading analytics, request management, knowledge management, library automation, and collections management solutions. LucideaCore applications are based on proven practices derived from decades of observation, coupled with agile development processes and cutting-edge technology. They enable clients to deliver valuable, user friendly tools enabling access to products, services and resources, offering:

- Universal access to organizational resources anytime, anywhere, on any device
- Integration with existing systems, resource and workflows, maximizing the value of organizational assets
- Design, administration and configuration tools leading to reduced IT dependence
- Confidence that information is seen by the right people at the right time

Lucidea is a knowledge management, electronic resource management, library automation and collections management software and solutions company that provides the infrastructure and sector-specific know-how to help organizations easily collect, organize, and leverage their information assets. Our products improve accessibility and use of resources and content for the people who need this knowledge most—employees, clients and visitors—resulting in higher employee productivity, lower operational costs and increased client and visitor satisfaction. With a global customer base of more than 2,300 active clients in more than 50 countries, Lucidea is the largest provider of KM, library and resource management, and collections management solutions to corporations, law firms, non-profits, museums, archives, and government agencies worldwide.
